PHYSICAL QUALITY PROFESSIONAL FACIAL TREATMENT

Intensive Q10 Treatment

WHAT IS IT? KYNUALE Q10 is a treatment based on nutrition, prepared with two fundamental bio-energetic ingredients: COENZYMIX Q-10 and CREATINE, which provide the skin with the necessary energy for its reactivation and repair. A perfect synergy that requires hydration in the skin.

COENZYMIX Q-10 and CREATINE provides the skin with the necessary energy for its reactivation and repair. It is a perfect synergy that instigates a well-awakening within your skin.

MARINE COLLAGEN: moisture which forms the formation of a skin protective layer.

REDUCTINE®: a mixture of actinopetals and anthocyanins with visible effects on the skin. It maintains the moisture balance, smooths the skin surface and provides the necessary nutrients for cell regeneration.

HYALURONIC ACID: known as the perfect humectant thanks to its capacity of hydration of the skin and its ability to retain moisture inside the skin.

ORGANIC SUGAR and VITAMIN C: extra firmness form.

AVOCADO OIL and SUGAR: provide nutrition thanks to their nutrients and antioxidants.

AMINO ACIDS: with some amino acids, the formation of well-balanced proteins.

COENZYMIX Q-10 and CREATINE: a mixture of actinopetals and anthocyanins with visible effects on the skin. It maintains the moisture balance, smooths the skin surface and provides the necessary nutrients for cell regeneration.

Incorporate a high content of hydrating and energy-stimulating ingredients into the skin, with the necessary energy for its reactivation and repair. The combination of COENZYMIX Q-10 and CREATINE provides the skin with the necessary energy for its reactivation and repair. It is a perfect synergy that requires hydration in the skin.

HOW TO APPLY?

PHASE 1

Content: R-REDUCTINE®, stabilized enzyme in bioenergetic ingredients, and a rich cream for reactivation and repair. It is a perfect synergy that requires hydration in the skin.

How to apply: time 10min. approx.

Apply the mix of phase to the skin with the skin with gentle movements until it is completely absorbed. Then, rinse the rest of the phase with fingers or fingers gently into the water. Use circular movements for 10 minutes, forming a smooth paste. The rest of the phase is then rinsed in water. The result is a lightened and clear complexion.

PHASE 2

Content: HYALURONIC ACID: a mixture of actinopetals and anthocyanins with visible effects on the skin. It maintains the moisture balance, smoothes the skin surface and provides the necessary nutrients for cell regeneration.

How to apply: time 10min. approx.

Apply the mix of phase to the skin with gentle movements until it is completely absorbed. Then, rinse the rest of the phase with fingers or fingers gently into the water. Use circular movements for 10 minutes, forming a smooth paste. The rest of the phase is then rinsed in water. The result is a lightened and clear complexion.

PHASE 3

Content: ORGANIC SUGAR and VITAMIN C: extra firmness form.

How to apply: time 10min. approx.

Apply the mix of phase to the skin with gentle movements until it is completely absorbed. Then, rinse the rest of the phase with fingers or fingers gently into the water. Use circular movements for 10 minutes, forming a smooth paste. The rest of the phase is then rinsed in water. The result is a lightened and clear complexion.

PHASE 4

Content: R-REDUCTINE®, stabilized enzyme in bioenergetic ingredients, and a rich cream for reactivation and repair. It is a perfect synergy that requires hydration in the skin.

How to apply: time 10min. approx.

Apply the mix of phase to the skin with gentle movements until it is completely absorbed. Then, rinse the rest of the phase with fingers or fingers gently into the water. Use circular movements for 10 minutes, forming a smooth paste. The rest of the phase is then rinsed in water. The result is a lightened and clear complexion.

PHASE 5

Content: ORGANIC SUGAR and VITAMIN C: extra firmness form.

How to apply: time 10min. approx.

Apply the mix of phase to the skin with gentle movements until it is completely absorbed. Then, rinse the rest of the phase with fingers or fingers gently into the water. Use circular movements for 10 minutes, forming a smooth paste. The rest of the phase is then rinsed in water. The result is a lightened and clear complexion.

VITAMIN VEGETABLE MASK 2030

How to apply: time 10min. approx.

Apply the mix of phase to the skin with gentle movements until it is completely absorbed. Then, rinse the rest of the phase with fingers or fingers gently into the water. Use circular movements for 10 minutes, forming a smooth paste. The rest of the phase is then rinsed in water. The result is a lightened and clear complexion.

INGREDIENTS

PHASE 1

1. Active ingredients of the 1st Gel and 3rd Powder: Arachidonic acid (15%), myristic (5%) and palmitic (5%) acids together, for about 30 seconds, forming a smooth paste. 3. With the same spatula apply and rest the mask on the face for about 5 minutes keeping it dry. 4. Remove the mask with a wet cloth. 5. Rinse the mask in water. 6. Use the mask on the face 15 to 20 minutes.

PHASE 2

1. Active ingredients of the 1st Gel and 3rd Powder: Arachidonic acid (15%), myristic (5%) and palmitic (5%) acids together, for about 30 seconds, forming a smooth paste. 3. With the same spatula apply and rest the mask on the face for about 5 minutes keeping it dry. 4. Remove the mask with a wet cloth. 5. Rinse the mask in water. 6. Use the mask on the face 15 to 20 minutes.

PHASE 3

1. Active ingredients of the 1st Gel and 3rd Powder: Arachidonic acid (15%), myristic (5%) and palmitic (5%) acids together, for about 30 seconds, forming a smooth paste. 3. With the same spatula apply and rest the mask on the face for about 5 minutes keeping it dry. 4. Remove the mask with a wet cloth. 5. Rinse the mask in water. 6. Use the mask on the face 15 to 20 minutes.

PHASE 4

1. Active ingredients of the 1st Gel and 3rd Powder: Arachidonic acid (15%), myristic (5%) and palmitic (5%) acids together, for about 30 seconds, forming a smooth paste. 3. With the same spatula apply and rest the mask on the face for about 5 minutes keeping it dry. 4. Remove the mask with a wet cloth. 5. Rinse the mask in water. 6. Use the mask on the face 15 to 20 minutes.

PHASE 5

1. Active ingredients of the 1st Gel and 3rd Powder: Arachidonic acid (15%), myristic (5%) and palmitic (5%) acids together, for about 30 seconds, forming a smooth paste. 3. With the same spatula apply and rest the mask on the face for about 5 minutes keeping it dry. 4. Remove the mask with a wet cloth. 5. Rinse the mask in water. 6. Use the mask on the face 15 to 20 minutes.

PHASE 6

1. Active ingredients of the 1st Gel and 3rd Powder: Arachidonic acid (15%), myristic (5%) and palmitic (5%) acids together, for about 30 seconds, forming a smooth paste. 3. With the same spatula apply and rest the mask on the face for about 5 minutes keeping it dry. 4. Remove the mask with a wet cloth. 5. Rinse the mask in water. 6. Use the mask on the face 15 to 20 minutes.
